REFRACTION SERVICES AND FEES

A refraction is the process and measurement of the lens power to determine your best corrected vision and if there is a need for corrective eyeglasses or contact lenses. It is an essential part of the eye exam and is necessary to write a prescription for glasses or contact lenses.

A refraction is NOT a covered service by Medicare or most medical insurance plans. These plans consider a refraction a “vision” service not a “medical” service and insist that we charge separately for that portion of the examination, since it is not a covered service.

We will NOT file the charge for a refraction with a health insurance unless we know that your plan covers the refraction charge.

Our office fee for a refraction is \$40. This fee is billed to all new patients and annually to all established patients. It is collected at the time of service in addition to any co-payment, deductible and co-insurance your plan may require. Should your plan pay us for the refraction, we will reimburse you accordingly.

In accordance with our contract and with your insurance provider, we are responsible for collecting, and you are responsible for paying, non-covered charges, co-payments, deductibles or coinsurance at the time of service.

We cannot file insurance on both the medical and routine vision plan for the same visit.
