

## **COVID-19 Update**

Kirby Eye Center requires all patients, visitors and staff to wear masks while in the office. Many of our patients are elderly and/or have systemic illnesses or diseases and are immune compromised. Our doctors and staff are required to be within inches from patients' faces in order to examine and treat them. Please help us keep you and our other patients safe.

All patients will be stopped for temperature screening when entering the Carrell Clinic Center building. Please make sure that you are wearing a mask or you will not be permitted in. Your mask or facial covering should be kept over your mouth and nose at all times when in the office. Patients do have the option to wait in their vehicles until it is time for them to be called back. We do our best to keep patients at a distance for everyone's safety. Please let us know prior to coming if you have any questions, concerns or requests.

Kirby Eye Center is doing our very best to decrease transmission of any infections by increasing the frequency of our existing sterilization procedures. We use sterilization sprays/wipes to clean all hard surface high traffic areas such as countertops, tabletops, keyboards, phones, door handles/knobs, chairs, etc., multiple times per day. We clean exam rooms (countertops, door handles, chairs) and equipment in between each patient.

Thank you for your cooperation in this matter.
